

# **Delta-8-THC Clinical Studies**

## **Delta-8-THC For Nausea**

Delta-8-THC is perhaps the most effective cannabinoid that can be used to aid with nausea.

### **1995 Study**

Back during 1995, Dr. Raphael Mechoulam performed a [study](#) of delta-8 THC for treating pediatric cancer patients in Israel. Delta-8 THC clinical trials were conducted on a group of eight different children with ages ranging from 3 to 13 undergoing chemotherapy treatment for different cancers.

Delta-8 was administered directly ahead of each dose of chemotherapy and then followed up at intervals of every six hours throughout a 24 hour time period. The study's end result was very promising. When undergoing delta-8 THC treatments, vomiting was completely prevented with side effects being insignificant.

### **National Cancer Institute On Delta-8-THC**

Aside from its powerful anti-emetic capabilities, the [National Cancer Institute](#) cites delta-8 for possessing strong anti-anxiety effects. It is also cited as inducing an increase in appetite while displaying reduced cognitive effects typically occurring with THC.
